Since September 2017, I have worked in frontend development; I currently oversee the design and development of user-experience-focused interfaces at @shopier. I value teamwork and treat consistency, accessibility, and performance as delivery standards. For more information, please see my résumé and social media profiles.

Experience

Senior Frontend Developer at Shopier (2025 - Present)

- Since November 2020, I have been leading the design and development of user experience–focused interfaces at Shopier. Below, you can find details of the projects I have been involved in.

- **Masterpass Integration**: Integrated Masterpass (the global payment infrastructure of Masterpass) into Shopier. Implemented features such as linking a Masterpass account with Shopier, adding and removing cards, tokenization processes, and payment flows.

- Shopier Mainpage: Developed the redesigned homepage of Shopier.

- Technologies used: Pug(Html Template Engine), Tailwind CSS, Bootstrap(Only scripts), Swiper Js, Lottie(For animations), Webpack, Video Js

Frontend Developer at Shopier (2020 - 2025)

- **Shopier Storefront**: Contributed to the development of Shopier's redesigned storefront page.

  - Technologies used: Pug(Html Template Engine), Tailwind CSS, Bootstrap(Only scripts), Swiper Js, Lottie(For animations), Webpack

- Shopier Appstore: Built the frontend of Shopier's application marketplace, where Shopier apps are listed. I was responsible for all frontend development.

  - Technologies used: Next.js, Bootstrap, Formik, React Html Parser, Simple React Lightbox, Swiper Js, Yup

- Shopier Blog : Developed Shopier's official blog. I was responsible for the entire development process.

  - Technologies used: Wordpress, Bootstrap, JQuery, Gulp

Frontend Developer at Veveya Bilişim (2018 - 2020)

- I started at the company as an intern and, after completing my internship, continued working full-time. During this period, I contributed to various projects by developing with HTML, CSS, and JavaScript.

- **Projects I have been involved in:** Misli.com mobile website, Horobox.com, Horopool.com, an internal project for Garanti Bank employees, Raysigorta.com.tr, Tongucakademi.com

Intern at Veveya Bilişim (2017 - 2018)

- I started as an intern, initially learning HTML, CSS, and JavaScript from scratch. Later, I contributed to a real-world project and became actively involved in the development process.
